## EXPERIENCE

### Openreach (BT) — *Advanced Engineer*

2017 - PRESENT

Operating both independently and in teams to plan, commission, repair, and maintain the Openreach Fiber and Telecommunications networks.

Lead "Brickwall-case" handler, focusing largely on the business and corporate sectors.

Working on networks for the BBC, Jaguar-LandRover, the Ministry of Defence, the US Air Force, and the estates of some influential people.

### Shell Energy — *Broadband Specialist*

2015 - 2017

Headhunted by Shell to join their new team as a specialist when a pilot campaign I was spearheading for them became successful.

Investigating unresolved technical issues and working with stakeholders to resolve long-standing faults.

Collaborating with sales teams to help grow the company's new product.

### Sitel — *Campaign Supervisor*

2013 - 2015

Assisting sales and technical advisers with tricky queries as well as training new staff.

Responsible for day-to-day reports and supervision of the support center.

Selected to spearhead a small Broadband pilot campaign for one of our largest stakeholders.

*Additional employment history available upon request.*

## EDUCATION

BTEC - Person - 2019

Solutions Architect Associate - AWS - 2024
